Continuing and Professional Studies Programs

Certificate in Applied Counselling

The Applied Counselling Certificate provides an introduction to the counselling process and helps learners develop effective counselling strategies. It is ideally suited for anyone working in a counselling context through paid or volunteer work. Participants' varied workplaces include: health care, education, social services, and government. Through this program, the student can choose a General Stream or Specialization in Addictions Studies. The latter combines courses in the ACC program with courses from the Addictions Foundation of Manitoba (<https://afm.mb.ca/>).

Ramsha Khan

Merrilyn A. Renkas

Certificate in Adult and Continuing Education

This collaborative program of the Universities of Manitoba, Alberta, Saskatchewan and Victoria is for individuals in the private or public sector who help adults learn. The Certificate in Adult and Continuing Education Program emphasizes application of theory and knowledge into skilled practice.

Rebecca D. Dutchak

Certificate in Applied Management

The Certificate in Applied Management provides participants with the opportunity for study in common management courses and in courses specific to a field of Specialization. All Certificate in Applied Management programs are offered in partnership with industries.

Julie Hannaford

Brandy A. O'Reilly

James B. Popel

Alix-Rae Stefanko

Letter of Accomplishment (LOA) in Teaching English as a Second Language

TESL graduates may teach English to newcomers or teach English abroad. In this program accredited by TESL Canada, they have considered what it means to study and learn a language, studying theory and strategies during intensive online training, and polishing their teaching skills with an in-class practicum in a real ESL classroom setting.

Juliana L. Dueck

Post-Baccalaureate Certificate (PBC) in Aerospace Program Management

The Post-Baccalaureate in Aerospace Program Management offers the tools and knowledge needed to be a leader in the sophisticated and dynamic aerospace industry. The Post-Baccalaureate Certificate is an advanced credential in aerospace program management designed for current and future project, production, and operational managers, design engineers, and procurement and logistics specialists wishing to enter the field or advance their career in the aerospace industry. Learners will develop an in-depth understanding of the complete life cycle of an aerospace system; from initial identification of system requirements, to the design, manufacturing and marketing of the system, to its ongoing employment and maintenance.
